Experience

Cornell University

GRADUATE RESEARCH ASSISTANT

08/2018 - Present

Developed DAHLIA, a High-Level Synthesis language that hardware resource constraints using affine types and region-based capabilities and improves Design Space Exploration by explicating constraints at the source level.

Facebook Reality Labs

RESEARCH INTERN

05/2019 - 08/2019

Applied program synthesis techniques to automatically generate correct and efficient hardware for emerging mathematical domains such as log arithmetic.

Google

SOFTWARE ENGINEERING INTERN

05/2018 - 08/2018

Implemented support for Progressive Web Applications for internal web application framework. Improved tooling for reporting metrics to framework users and added support for running experiments with web applications.

University of Massachusetts Amherst

RESEARCH ASSISTANT

05/2016 - 05/2018

Developed FISSION, a compiler for partitioning single-tier JavaScript program while enforcing information flow control.

Brown PLT, Brown University

VISITING RESEARCHER

05/2017 - 08/2017

Developed STOPIFY, a source to source compiler for JavaScript that provides common debugging abstractions like stopping, stepping and break-pointing, in a browser based IDE for languages that compile to JavaScript.
